## Chorouk Association

for

the Advancement of the  
Condition of Women and the  
Protection of Children

Rue 1, Boulevard Hassan II  
Boudnib, 52150 Errachidia  
Morocco

# Association Philosophy

We are a women's association recently created in Boudnib whose members have all completed a higher education. Our philosophy is based on our conviction to help solve the various problems and challenges that women face in their daily lives so that they may succeed in the modern world.

# Association Objectives

In order to contribute to the local development of Boudnib, Chorouk utilizes all of their resources to meet as many objectives as possible and to better improve the situation and condition of local women.

Despite limited resources, the ambition, will, and logic of our members have allowed us to achieve the following objectives, as stated in Part 1, Article III of the association statute:

- I. To develop the condition of women.
- II. To address the problems particular to children.

**1.** To these ends, Chorouk is involved in numerous activities, such as literacy training, with marginalized women in both rural and urban areas who have previously not had the opportunity to study.

**2.** Given the importance of a strong foundation of education to young children, we offer pre-school classes within the community.

**3.** We create assistance programs, such as maternity care, for women so that they may more easily participate in development projects.

**4.** We offer training courses in information technology to women and children.

**5.** We organize training days for women to focus on improving their products through an emphasis on both modern and traditional craft techniques.

**6.** We organize lectures and meetings to raise awareness and address some of the problems women face in their daily lives.

**7.** We organize meetings to raise awareness of environment and health issues.

**8.** We organize annual exhibitions of artisanal products produced by local women from Boudnib.
